

TECHNOLOGIES

DISCOVERING DAIRY WITH MILKSHAKE THE COW

TERM
3

PRE-PRIMARY/YEAR 1

We will be discovering dairy cows through technologies, from when and how cows make milk to the running of a dairy farm. Alongside art students from years 2-6, we will design and decorate Milkshake the Cow. We will be putting our knowledge of dairy cows to green screens. Using clay, we will make our own miniature dairy cow and film an informational clip using green screen boxes, mini microphones and light rings.

To finish off term 3, the P/Is will design and create a game using Scratch Junior.

YEAR 2/3

In 2/3 we will learn all about dairy cows and the use of technologies on dairy farms. Using green screens, we will create a news segment about Milkshake the Cow. We will also be creating our own Milkshake radio station where we will learn to plan an episode, record ourselves, interview others and edit postproduction.

We're looking forward to another exciting term ahead full of creativity and innovation!
